Municipal

QUANTITIES:

Clearing- 4.06 Acres
Excavation- 15,329 CY
Embankment- 4,380 CY

DURATION:

Oct. 2015 - March 2016

Emery Sapp & Sons were contracted for the construction of a track embankment and sub ballast, in preparation for the expansion of City Utilities existing rail-serve loop track offloading facility. This project consisted of clearing 4.06 acres, excavating 15,329 cubic yards, and building 4,380 cubic yards embankment and 7,230 cubic yards sub ballast required for the preparation of the track. In conjunction to the track embankment, containment embankments were also built.
